1. Database Tables

78 tables in the public schema. All tables have Row Level Security (RLS) enabled.

Table Name	Approx Rows	RLS
admin_activity_log	1	Enabled
admin_adjustment_templates	0	Enabled
admin_nctr_adjustments	1	Enabled
admin_settings	6	Enabled
admin_user_notifications	1	Enabled
admin_users	1	Enabled
alliance_partners	42	Enabled
auth_nonces	2	Enabled
benefit_activation_history	0	Enabled
benefit_type_settings	8	Enabled
bounties	35	Enabled
bounty_claims	0	Enabled
brands	9	Enabled
check_ins	0	Enabled
claim_gifts	0	Enabled
claim_packages	10	Enabled
content_submissions	5	Enabled
contributed_reward_earnings	0	Enabled
creator_referral_earnings	0	Enabled
cross_platform_activity_log	5,192	Enabled
earning_opportunities	6	Enabled
featured_creators	1	Enabled
feedback	5	Enabled
gear_vault_config	7	Enabled
gear_vault_items	0	Enabled
glossary_terms	1	Enabled
groundball_rewards	18	Enabled
handle_audit_log	0	Enabled
handle_history	3	Enabled
member_active_benefits	0	Enabled
member_ambitions	7	Enabled
member_groundball_status	1	Enabled
member_reward_selections	10	Enabled
membership_history	0	Enabled

merch_milestones	0	Enabled
merch_purchase_bounty_eligibility	15	Enabled
nctr_deposits	1	Enabled
nctr_transactions	20	Enabled
notification_settings	8	Enabled
notifications	33	Enabled
profiles	37	Enabled

user_delivery_profiles	6	Enabled

user_onboarding	0	Enabled
user_roles	1	Enabled
user_sessions	170	Enabled
wallet_portfolio	1	Enabled

2. Edge Functions

31 edge functions deployed. All use Deno runtime.

Function	Purpose	Key Secrets
bulk-sync-from-bh	Batch-sync all BH profiles to Crescendo	SYNC_SECRET
create-checkout-session	Create Stripe checkout for claim packages	STRIPE_SECRET_KEY
create-stripe-products	Provision Stripe products for packages	STRIPE_SECRET_KEY
founding-111-email	Send Founding 111 notification emails	RESEND_API_KEY
generate-sweat-token-image	Generate token images via Lovable AI	LOVABLE_API_KEY
mcp	MCP server for AI agent access	SERVICE_ROLE_KEY
merge-wallet-user	Merge wallet-auth user with email-auth user	SERVICE_ROLE_KEY
monthly-claims-distribution	Distribute monthly claims to tiered members	SERVICE_ROLE_KEY
post-to-twitter	Post content to Twitter/X	TWITTER_API_KEY/ SECRET
receive-lock-request	Inbound BH sync: update locked points & tier	SYNC_SECRET, SERVICE_ROLE_KEY
send-account-notification	Email account-related notifications	RESEND_API_KEY
send-approval-notification	Email when submissions approved	RESEND_API_KEY (TODO)
send-delivery-notification	Email delivery status updates	RESEND_API_KEY
send-feedback-notification	Email admin when feedback submitted	RESEND_API_KEY
send-gift-notification	Email gift claim notifications	RESEND_API_KEY
send-purchase-confirmation	Email purchase receipts	RESEND_API_KEY
send-submission-notification	Email submission status changes	RESEND_API_KEY
shopify-webhook	Process Shopify order webhooks	SHOPIFY_WEBHOOK_SEC RET
stripe-webhook	Process Stripe payment webhooks	STRIPE_SECRET_KEY, STRIPE_WEBHOOK_SECR ET
submit-external-feedback	Handle external feedback form submissions	RESEND_API_KEY
submit-reward-request	Handle user reward requests	RESEND_API_KEY
sync-crescendo-profiles	Sync profile data from Crescendo outbound	RESEND_API_KEY
sync-garden-portfolio	Webhook receiver for Garden wallet data	GARDEN_WEBHOOK_SEC RET
sync-packages-stripe	Sync claim packages to Stripe products	STRIPE_SECRET_KEY
sync-tier-to-bounty-hunter	Push tier/referral changes to BH	BOUNTY_HUNTER_SERVI CE_KEY
track-session-end	Record session end via sendBeacon	SERVICE_ROLE_KEY
user-status-export	Export user status for cross-project reads	SYNC_SECRET
verify-universal-auth	Provision/verify BH users in Crescendo auth	SERVICE_ROLE_KEY
wallet-auth	Challenge-response wallet authentication	SERVICE_ROLE_KEY
wingman-crescendo-audit	Admin audit tool for Wingman data	SERVICE_ROLE_KEY

wingman-crescendo-briefing	Crescendo-side Wingman briefing proxy	(delegates to BH)

3. Frontend Routes

47 routes total. Auth levels: No (public), Semi (layout if authed), Yes (ProtectedRoute), Admin (AdminRoute).

Route	Component	Auth Required
/	LandingPage / redirect	No
/terms	TermsPage	No
/privacy	PrivacyPage	No
/help, /faq	HelpPage	No
/claim	ClaimGiftPage	No
/about	AboutPage	No
/join/:slug	InviteLandingPage	No
/ref/:code	RefCodeRedirectPage	No
/crescendo	Crescendo	No
/rewards	RewardsPool	Semi
/rewards/:id	RewardDetailPage	Semi
/food-beverage	FoodBeveragePage	Semi
/sponsors	SponsorsPage	Semi
/become-sponsor	BecomeASponsorPage	Semi
/sponsors/:slug	SponsorProfilePage	Semi
/discover	DiscoverPage	Semi
/bounties	BountyBoardPage	Semi
/merch	MerchPage	Semi
/leaderboard	LeaderboardPage	Semi
/dashboard	Dashboard	Yes
/earn	EarnNCTR	Yes
/profile	ProfilePage	Yes
/profile/delivery	DeliveryProfilePage	Yes
/membership	MembershipLevelPage	Yes
/benefits	BenefitsPage	Yes
/membership/history	MembershipHistoryPage	Yes
/membership/statistics	MembershipStatisticsPage	Yes
/deposit	DepositPage	Yes
/submit-reward	SubmitRewardsPage	Yes
/my-submissions	MySubmissionsPage	Yes
/purchase-history	PurchaseHistoryPage	Yes
/buy-claims	BuyClaimsPage	Yes
/gift-claims	GiftClaimsPage	Yes
/claims	ClaimsPage	Yes

/invite	InvitePage	Yes
/referrals	ReferralAnalyticsDashboard	Yes
/wishlist	WishlistPage	Yes
/favorites	FavoritesPage	Yes
/submit-content	SubmitContentPage	Yes
/my-content	MyContentPage	Yes
/notifications	NotificationsPage	Yes
/contribute	ContributePage	Yes
/sponsor/dashboard	SponsorDashboard	Yes
/sponsor/profile	SponsorProfileEditor	Yes
/sponsor/rewards/new	SponsorSubmitReward	Yes
/admin/*	AdminPanel	Admin
/wingman-audit	WingmanAuditPage	No

4. Crescendo-Specific Status

4.1 Status Tiers

Tier	Min Lock	Max Lock	Multiplier	Claims/Mo	Discount	Slots
Bronze	1,000	999*	1.0x	1	0%	1
Silver	5,000	4,999*	1.25x	5	10%	2
Gold	15,000	14,999*	1.5x	12	15%	3
Platinum	40,000	49,999	1.8x	25	20%	4
Diamond	100,000	None	2.5x	50	25%	6

** Bronze/Silver/Gold max values appear inverted (max < min). See Known Issues.*

4.2 Sync Bridge to Bounty Hunter

- Bidirectional sync is active between Crescendo and Bounty Hunter (BH).
- Outbound: sync-tier-to-bounty-hunter pushes tier + referral code to BH.
- Inbound: receive-lock-request receives lock updates from BH, recalculates tier.
- BH API endpoint: https://auibudfactqhisvmiotw.supabase.co/functions/v1/admin-api
- Auth method: x-sync-secret header with shared secret.
- User status reads: UnifiedUserContext calls BH admin-api with action get_user_status.

4.3 Infrastructure

- Crescendo Supabase project: yhwcaodofmbusjurawhp
- Bounty Hunter Supabase project: auibudfactqhisvmiotw
- Lovable project ID: b7bca209-cde6-4446-b370-04f75ce9b6da
- Published URL: crescendo-nctr-live.lovable.app

5. Known Issues

- **CRITICAL — Stale tier data: UnifiedUserContext reads tier from local status_tiers DB. Goes stale when BH updates. Phase 1 fix (call BH user-status-export) not yet implemented.**
- Hardcoded sync secret (nctr-bh-crescendo-sync-2026) exposed in client-side code (UnifiedUserContext.tsx line 237).
- status_tiers max values are inverted: Bronze max=999 < min=1000, Silver max=4999 < min=5000, Gold max=14999 < min=15000. Range queries will fail.
- Dual-write risk: profiles table (37 rows) and unified_profiles (41 rows) both store user data. Several DB functions still write to profiles.locked_nctr / profiles.claim_balance.
- send-approval-notification: RESEND_API_KEY not wired — emails logged but never sent.
- analytics.ts: Tracking and user identification are stub functions (TODO).
- BenefitsPage.tsx: Manage modal not implemented (TODO).
- GroundballRewardsPage.tsx: onViewDetails and onHowToLevelUp are empty handlers.
- CommitmentArc component exists but is NOT used on the /membership page.
- 'Shop The Garden' / merch references persist in 13 files including WelcomeFlow, MerchStoreCTA, BountyCard, MerchPage, AboutPage, BountyBoardPage.

6. Recent Changes

Most recent first (approximate chronological order):

1. Wingman FAB reverted to circular (borderRadius: 50%) to match BH design
2. Wingman sidebar section removed from AppSidebar — Wingman now FAB-only
3. Multiple attempts to force square FAB (borderRadius: 0) with CSS overrides
4. WingmanFAB bottom drawer created with ASK/FEEDBACK tabs, BH data integration
5. MerchStoreCTA removed from Dashboard layout
6. Membership page switched to nctr_locked_points (from legacy locked_nctr)
7. sync-tier-to-bounty-hunter redeployed (2026-04-06) for CORS refresh
8. CommitmentArc SVG component created, integrated into StandingsTab
9. Cross-platform sync bridge built (receive-lock-request, user-status-export)
10. Handle system with 181 reserved handles seeded, audit log and history tables created

---

End of audit. Generated April 13, 2026. No changes were made to the codebase.
